Simulation-X and Machine learning

1 Master research project (3-9 month)

Contact: andres.garcia@iqs.url.edu

Summary:

Student will work in Industrial Engineering Lab modelling different experiments with https://doc.simulationx.com/4.3/1033/Content/SimulationX.htm Student can choose hydraulics, multi-boby mechanics, conveyors, integration with PLC, 3Dprinting, thermal engines… depending on their background. The main idea is to start from a similar tutorial https://doc.simulationx.com/4.3/1033/Content/Tutorials.htm to create the simulation model of the experiment carried out at IQS.
